OMAHA (DTN) -- USDA officials said Thursday the Trump administration's new \$16 billion trade-aid package will not distort planting decisions, but farmers will have to plant a crop this spring to be eligible for payments.

The aid package reflects the Trump administration expects the trade war with China could continue for a lengthy period of time.

"You will not receive payments if you do not plant," said Rob Johansson, USDA's chief economist. May 23, 2019
